

Dynamic pathway event grammar standardization

A. From pathway curves to event grammar

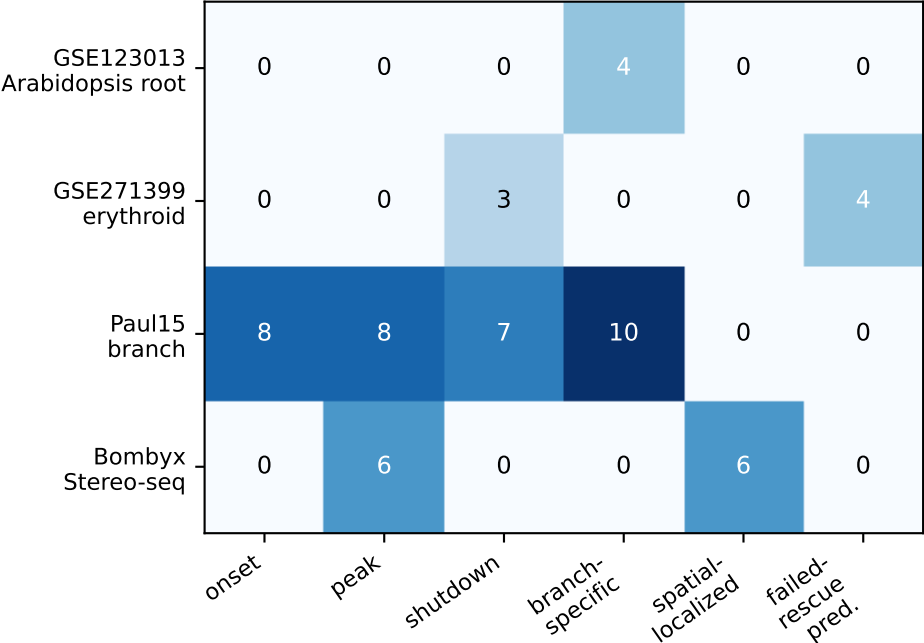

Output: `dynamic_pathway_event_table.tsv`

B. Event-type coverage in standardized table

C. Dataset x event-type coverage

D. Required event-row fields

pathway
event_type
event_FDR
event_FDR_available
robustness_score
claim_boundary
supported_interpretation
unsupported_interpretation

Scores alone: activity changes.
TED event rows: event type, robustness, and supported interpretation.
