

Dynamic pathway event grammar standardization

A. From pathway curves to event grammar

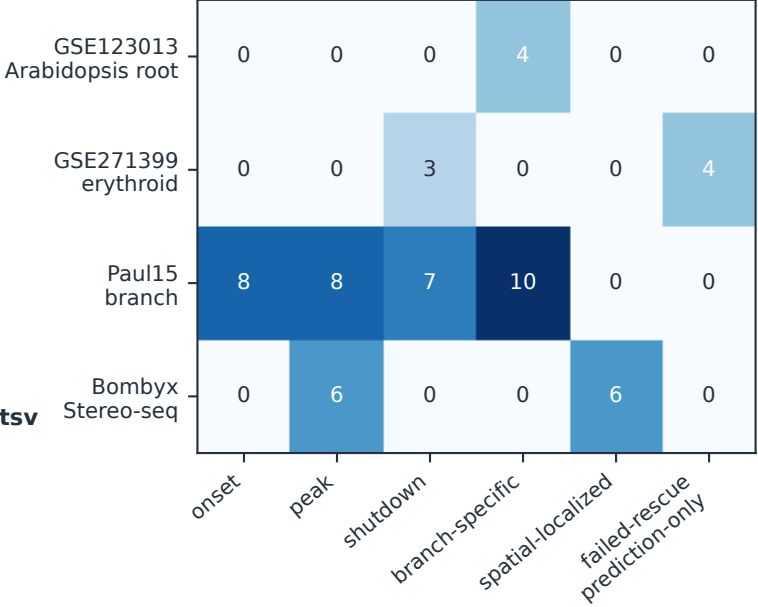

Output: dynamic_pathway_event_table.tsv

B. Event-type coverage

C. Dataset x event-type coverage

D. Required event-row fields

pathway
event_type
event_FDR
event_FDR_available
robustness_score
evidence_boundary
supported_interpretation
unsupported_interpretation

Scores describe activity changes; TED rows add event type, robustness and an auditable evidence boundary.
